

# ON SURFACE

## DATA SHEET ON SURFACE CAMERAS

It allows control of everything that happens on the surface in the farming facility and the surrounding areas.

The various models have optical zoom of up to 42X, being able to zoom in with the highest image fidelity. These surveillance systems are positioned at a height of 5 meters with a stainless-steel pedestal and anchorage designed not to corrode or disturb the free transit through the corridors of the facilities.

It is operated from the control room by a joystick and colour monitor.
