

# MOTIONLESS

DATA SHEET

## MOTIONLESS CAMERA

The digital FF series underwater cameras adapts to each client demands for both, fish farming and in cage rafts located in sea centers.

The digital FF motionless underwater cameras series are connected to the ITG Optic or ITG IO communication stations which allows up to 8 cameras per cage and transmits the video signals by optical fiber or wirelessly to the monitoring station, where we can watch all the images simultaneously by using our Site Controller viewing software.

The high quality images, its versatility and low maintenance level, make the Digital DUPLEX cameras an essential equipment for fish farming, maximizing the business profitability
